To: School Administrators and Faculty

I am writing this letter as the President of Alpine Saskatchewan with respect to a student within your school system. Its purpose is to request your institution's support for accommodating their scholastic needs and athletic endeavours.

The student will be participating in the upcoming season with their local alpine skiing club and will be pursuing personal athletic goals. This pursuit implies limited time away from home and school to travel, train, and race at a competitive provincial level at locations relevant to this sport.

The athletes' calendars have been planned with school responsibilities in mind, but there will be conflicts. Your administration and faculty will be approached by the student to discuss how this can be accommodated. Creativeness and flexibility will be needed to develop a strategy that will be effective for all parties. It is expected that everyone's goals can be achieved when all the parties put a commitment into this student's venture.

That being said, the athlete, parents, coaches, and our organization want to emphasize that your student's participation in Alpine Saskatchewan's athletic programs is contingent on balancing these activities with their academic goals. They will have agreed to this as part of joining the program.

As the provincial alpine ski governing body, we thank your school system and teachers for working with the student to assist them in achieving their academic, athletic and life skill goals.

Thank you for your consideration,

Terry Hooper
President
Alpine Saskatchewan
